

## Connectivity Basic Package

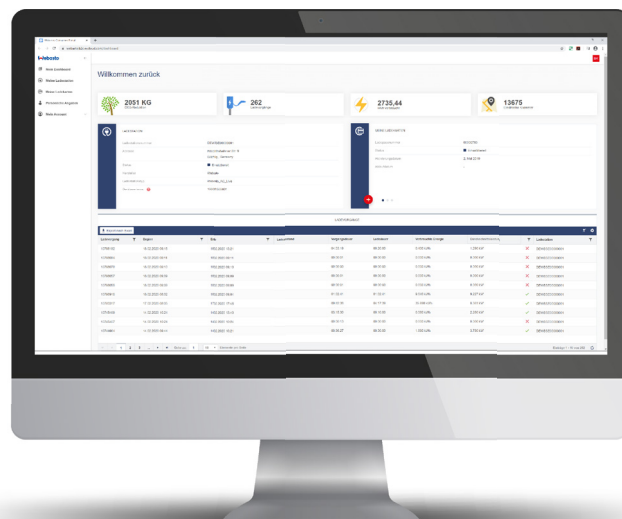

### The Effortless Way to Manage a Webasto Charging Station

The Connectivity Basic Package is your first step into the world of connected charging. It is perfect for personal or business use of the charging station and users who require an overview of the charging processes made. This package includes all key control and usage functions of Webasto Live and provides a detailed data analysis of the charging processes.

### The Connectivity Basic Package at a glance:

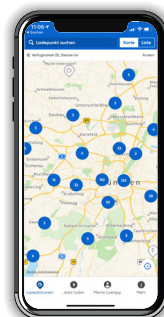

- 2 years Connectivity access with option to extend
- Easy management and remote control of the charging station in the Webasto Charging Portal
- Mobile management via the Webasto LiveApp, e.g. starting and stopping the charging process, status alerts and insight into the charging history
- Detailed charge data reporting gives you a clear overview of the completed charging processes, such as charge time, charge duration or kilowatt hours used
- Easy user management: register any number of access rights

## Webasto LiveApp

The Webasto LiveApp goes wherever you go and shows you public charging stations as well as your personal charging station. You also get an overview of your charging history, can start and end the charging process remotely and easily manage users.
